KEY INTERESTS AND AREAS OF SPECIALIZATION

I use the lenses of political geography and landscape to develop a long-term understanding of political strategies of consolidation and control, bottom-up social movements, and identity transformation. I have particular area expertise in the Andes, with research on multi-community polity and state formation in the southern Titicaca Basin in Bolivia (Chiripa and Tiwanaku) and rebellious social landscapes in Peru (Inca and Spanish colonial). My methodological expertise includes geochemical and lithic analysis, GIS, and spatial analysis (space syntax and network analysis). I also have analytical experience in ceramics and starch grains from stone tools.

BOOK

Hu, Di. 2020 (expected). The fabric of resistance: Textile workshops and the rise of rebellious landscapes in colonial Peru. Historical Archaeology in South America series, University of Alabama Press. Under advance contract. Project is supported by a Wenner-Gren Hunt Postdoctoral fellowship.
